International filing date (day/month/year)

25.11.2003

IMPORTANT NOTIFICATION

Priority date (day/month/year)

03.12.2002

Applicant

BAE SYSTEMS PLC ET AL

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY International application No. PCT/GB 03/05137 EXAMINATION REPORT - SEPARATE SHEET

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. Claims 24 and 25 do not comply with Rule 6.2(a) PCT, cf. PCT Guidelines Chapter 5, paragraph 5.10.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of independent claim 22 is not new in the sense of Article 33(2) PCT.
- 1.1 Document EP-A-1 081 043 (D1) discloses (cf. page 4, lines 24-32 and figure 2) an assembly of two components (a skin (4) and a sub-structure (2)) for forming a fluid-tight seal together ("to prevent liquid ingress"), each component having a mating surface for sealing to a mating surface of the other component (figure 2), at least one of said mating surface having a layer of wet polysulphide sealant thereon.

The assembly of D1 is shown in a state where both components thereof have been fixed to one another, which is implicitly obtained after the wet polysulphide sealant present between both components has cured. In that respect, notwithstanding the sequence used for fixing the components by means of the mentioned sealant, the final result will necessarily be an assembly of two components fixed to one another and as claimed in claim 22, that is, an assembly wherein at least one mating surface, in the present case both mating surfaces, has (have) a layer of <u>cured</u> polysulphide sealant thereon.

- 1.2 More generally, each method of assembling components where the components are fixed by curing a layer of polysulphide sealant between them will anticipate the features of claim 22. This is in particular the case for each document cited in the search report.
- 2. Dependent claim 23 does not appear to contain any additional features which, in combination with the features of claim 22, meet the requirements of the PCT with

International application No. PCT/GB 03/05137 INTERNATIONAL PRELIMINARY

EXAMINATION REPORT - SEPARATE SHEET

respect to novelty and/or inventive step, the reasons being as follows:

D1 discloses an assembly of components with polysulphide sealant applied to aircraft components.

A fuel storage system for an aircraft is an aircraft component and is merely one of several straightforward possibilities from which the skilled person would select, in accordance with circumstances, without the exercise of inventive skill, in order to apply the teachings of D1.

Method claims 1 to 21 seem to meet the requirements of Article 33 PCT with 3. respect to the available prior art.
